Summary

As a dedicated Full-Stack Developer and software engineering student with 2 years of experience, I possess a wide range of skills including proficiency in C#, object-oriented programming, HTML, CSS, JavaScript, Reactjs, Vue js, Python basics, and MERN stack development. With the ability to seamlessly bridge the gap between front-end and back-end development, I create innovative and user-friendly solutions that meet modern business needs.

My services include web application design, developing responsive websites using React, bug fixing, website redesign, and developing dynamic and intuitive web applications using the MERN stack. I am committed to providing customized and user-friendly solutions that meet your requirements.

I am a collaborative team player who enjoys working in a fast-paced environment and always willing to learn and improve my skills. I pay close attention to detail and strive to create high-quality work.
